

Bulletin - Engineering Experiment Station. Illinois. University Volume 40-50

Filesize: 8.62 MB

Reviews

These types of book is the greatest ebook readily available. I was able to comprehend every little thing using this published e pdf. I realized this pdf from my dad and i encouraged this publication to discover.

(Dr. Porter Mitchell)

BULLETIN - ENGINEERING EXPERIMENT STATION. ILLINOIS. UNIVERSITY VOLUME 40-50

To download **Bulletin - Engineering Experiment Station. Illinois. University Volume 40-50** eBook, remember to follow the web link below and download the file or gain access to other information which are have conjunction with **BULLETIN - ENGINEERING EXPERIMENT STATION. ILLINOIS. UNIVERSITY VOLUME 40-50** ebook.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1909 Excerpt: .to the condition wherein this third type of oxidation would begin. g. The fourth stage of oxidation may be indicated as occurring at temperatures above 200 to 275 and differs from the previous stages in that the action is autogenous and not dependent upon other sources of heat to keep up the reacting temperature. Activity in this stage is further accelerated by the fact that above 300 the decomposition of the coal begins, which is exothermic in character, thereby contributing somewhat to a further increase in temperature. The ignition temperature is reached at a point still further along, usually in excess of 300 to 400C. 5. The above formulation of the various stages and types of oxidation clearly indicates the principles which must be observed in any attempt at the prevention of spontaneous combustion. The following enumeration, therefore, of preventative or precautionary measures is to be considered as suggestive rather than complete in character. a. The avoidance of an external source of heat which may in any way contribute toward increasing the temperature of the mass is a first and prime essential. b. There must be an elimination of coal dust or finely-divided material. This will reduce to a minimum the initial oxidation processes of both the carbonaceous matter and the iron pyrites. These lower forms of oxidation are to be looked upon as forces, without which it would be impossible for the more active and destructive activities to become operative. c. Dryness in storage and...
